

Australian Antarctic Division

The Australian Antarctic Program (AAP) is a collaborative partnership across government and more than 150 national and international research institutions. The AAP's Antarctic, sub-Antarctic and Southern Ocean scientific research contributes to understanding the world's climate and the effects of climate change with it also leading international policy on preserving Antarctica as a natural place devoted to peace and science.

Centre for Marine Sociology

The Centre for Marine Socioecology is a collaboration between the University of Tasmania and the CSIRO, with support from the Australian Antarctic Division. Based in Hobart at the University of Tasmania, CMS was established, ultimately, to address the current and future use of our marine coasts and oceans using a coordinated interdisciplinary and transdisciplinary approach.

Institute for Marine and Antarctic Science (IMAS)

The Institute for Marine and Antarctic Studies (IMAS) is an internationally recognised centre of excellence for marine and Antarctic research and education, developing environmental understanding, and facilitating sustainable development for the benefit of Australia and the world. There are three core research programs in Fisheries and Aquaculture, Ecology and Biodiversity, and Oceans and Cryosphere.

Tasmanian Institute of Agriculture

The Tasmanian Institute of Agriculture (TIA) is a specialist institute at the University of Tasmania with a mandate to deliver research, industry development and education for the agri-food industry of Tasmania. TIA's vision is to enable Tasmanian food producers and processors to accelerate primary sector productivity while maintaining and improving Tasmania's land and water quality for future generations.

<https://www.utas.edu.au/tia>

University of Tasmania

The University of Tasmania provides teaching, learning, research and engagement for and from Tasmania.
